Fever Buster Towel

We at Swim-Dry pride ourselves in being a well-fledged, 100% female-owned company. We are the hallmark of innovation in Microfiber and our management and design teams together with our superior international factories are transformative in aligning to principles of top-quality, fit-for-purpose products. Due to the fierce market for Microfiber products it is imperative to compare when making your purchase.

Our ground-breaking Micro-replication technology is elite in the Microfiber textile industry and allows for the splitting of fibres which increase the surface area for absorption.

These quality strands are .01 to .02 measurements more dense which trebles the durability – we boast threads that are 100 times thinner than the human hair!

Many microfiber products may be sufficient for utility but not for use on the human body. Our 90000- 225000 density count combined with an 80-20 ratio of polyester to polyamide is the perfect blend and weave for plush and tufted drying.

Quality costs and quality construction is not always obvious. The Swim-Dry label is a guaranteed quality assurance that delivers a fabulous, feather-soft feeling against the skin whilst still driving away moisture in a matter of seconds.
